Final Project Brief

Hani Hasan AbuAlinain

1. Description:

It is a website for selling electric cars of all kinds and giving information about each car separately, such as model, price and specifications by companies.

2. Goal:

This idea existed because of the global trend of renewable energy, environmentally friendly natural energy and reducing the polluting energy of the environment and for introducing people to the benefits of environmentally friendly electric cars and encouraging them to buy these cars instead of cars that are harmful to the health and environment.

3. Technologies:

- HTML**.**
- CSS and Bootstrap**.**
- JQuery**.**
- Python (Django framework).

4. Main Features:

The website contains several roles for users to enable them to add, edit, delete and view the product according to the role of each user.
